

Week Two

This week we went on a Geography walk down Holbein Close and Renoir Close. We saw a zebra crossing, parked cars, shops, a post box, trees, houses, gates and car parks.

Rucstall Primary School is also on Holbein Close as well as some of our houses!

We had to cross the road and we had to make sure that we look both ways, listen and wait if there is a car.

This week in our discovery time we have been playing with the water. We have made a game called the 'oil game' where we poured water down the bank and try and catch it.

In maths this week we have been learning about 3D shapes. We have learnt about cones, cubes, cylinders, triangular prisms, cuboids, pyramids and spheres.

We have been investigating whether these shapes roll or stack. They need a curved face to roll and a flat face to stack.
